Storm Water – USEPA’s New Rule and Local Initiatives

Tuesday, May 8, 2007

9:00 – 10:30 A.M.

Worcester Regional Chamber of Commerce

The Central Massachusetts Business Environmental Network (CMBEN) is pleased to invite you to a presentation on Storm Water management. The meeting will focus on storm water management at industrial and commercial facilities, and profile an outreach program in the Blackstone River Valley.

Thelma Murphy, Region 1 Coordinator for the United States Environmental Protection Agency (USEPA) Storm Water program, will review the new Multi-Sector General Permit for industrial facilities. The MSGP-2000 expired on October 30, 2005 and has been administratively continued by USEPA for those covered under the permit. The new MSGP-2006 has gone through public comment and will be promulgated shortly. We will review significant changes under the new rule including new storm water monitoring requirements.

Dona Neely, Outreach Coordinator, at the Blackstone River Coalition, will review their storm water management outreach and recognition program available to local industry and businesses in the Blackstone River Watershed. The “In Business for the Blackstone” program is designed to educate and support local industry and businesses to incorporate simple Best Management Practices for storm water pollution prevention that can provide environmental and economic benefits.
